PROFESSIONAL SUMMARY

Enthusiastic and detail-oriented Software Tester with a B.Tech in Electronics and Communication Engineering (ECE) background and certification in Advanced Software Testing. Skilled in both Manual and Automation Testing, with practical exposure to Selenium WebDriver and Playwright, and strong knowledge of SDLC, STLC, test case design and execution, functional and non-functional testing, and defect identification and tracking. A quick learner with a proactive mindset, dedicated to ensuring software quality and delivering reliable, bug-free applications. Demonstrated leadership through managing college dance and fashion teams, showcasing strong teamwork, coordination, and organizational skills.

SKILLS

- **Manual Testing:** Test Case Design & Execution, Bug Identification & Reporting. Functional & Non-Functional Testing, Regression & Retesting, Performance Testing
- **Automation Testing:** Selenium WebDriver, Playwright
- **API Testing:** Postman
- **Performance Testing:** Apache JMeter
- **Programming:** Python, C
- **Databases:** MySQL
- **AI Tool**: ChatGPT, Claude, AntiGravity
- **Soft Skills:** Analytical Thinking, Problem Solving, Attention to Detail, Communication, Teamwork, Time Management

EXPERIENCE

SMEC Technologies — *Jul 2026 – Oct 2026*

Software Tester — *Kochi*

Completed **Advanced Software Testing training**, gained practical knowledge in **Manual Testing** and **Automation Testing**.

Manual Testing

- Executed detailed test cases on 10+ real and demo websites to ensure full **functional and usability coverage**.
- Conducted **regression, functional, and non-functional testing** to verify existing features were unaffected by new changes.
- Proactively identified, documented, and tracked **bugs and defects**, contributing to improved product quality and reliability.
- Gained practical knowledge of **SQL and Python**, applying SQL for database queries and data validation, and Python for understanding programming concepts relevant to software testing.
- Learned **Agile methodology** and its application in software testing, including sprint planning, test execution, regression testing, and defect tracking.
- Performed manual testing of a hospital website by creating and executing test cases, identifying functional defects, and preparing detailed bug reports with proper severity and priority.

Automation Testing

- Developed and executed automated test scripts using **Selenium WebDriver** and **Playwright** to validate web application functionality and user workflows.
- Practiced locating and interacting with web elements using XPath, CSS Selectors, and other locators, handling dropdowns, alerts, frames, multiple windows, and browser navigation.
- Implemented automation testing concepts such as waits, assertions, test execution, and result validation to improve test reliability and identify functional defects.
- Utilized reusable test scripts and automation workflows to reduce repetitive manual effort and improve test execution efficiency.
- Performed automation testing on demo websites using Selenium WebDriver and Playwright, validating web elements, user interactions, navigation, and application functionality through automated test scripts.
- Performed **API testing** using **Postman** to validate HTTP requests, response status codes, response bodies, and headers, and conducted **performance and load testing** using **Apache JMeter** to analyse response time, throughput, error rates, and application behaviour under varying user loads.

PROJECTS

SMEC Technologies Website - Manual Testing

- Created and executed detailed test cases covering functional requirements, user workflows, navigation, forms, links, and UI elements.

- Performed functional, UI, exploratory, regression, and compatibility testing to verify application behavior and ensure a consistent user experience.
- Identified, documented, and tracked defects with reproducible steps, expected and actual results, severity, priority, and supporting evidence; conducted defect retesting and regression testing to verify fixes.
- Tested form validation, input fields, error messages, and page navigation to verify expected behavior and identify usability issues across website pages.
- Verified website content, broken links, image loading, and interactive elements to identify inconsistencies and ensure a smooth user experience.

BlueHost Website - Automation Testing

- Developed and executed automated test scripts using Playwright with Python to validate website navigation, links, and interactive UI elements.
- Created test cases for form validation, input fields, error messages, and expected page behavior across different user scenarios.
- Implemented assertions to verify page titles, element visibility, URL navigation, and expected results, ensuring reliable UI functionality.
- Used Pytest for test execution and reporting, and captured screenshots during test failures to support debugging and defect analysis.
- Performed cross-browser automation testing using Selenium WebDriver and Playwright to verify consistent website functionality and behavior across different browsers.

Safety-Enhanced Smart Iron With Predictive Thermal Control

- Developed a smart ironing system using Model Predictive Control (MPC) to regulate temperature and improve operational safety.
- Designed an automatic self-lifting mechanism using a solenoid actuator to lift the iron when left idle, reducing the risk of fabric burns.
- Integrated an ESP32 microcontroller, temperature sensing, and electronic power control to support intelligent thermal management and safety functions.
- Preparing for patent filing to highlight the innovation in predictive temperature control and automatic self-lifting technology

LEADERSHIP AND ACTIVITIES

College Fashion Team – Magnum CEC
Led and coordinated college fashion team activities, supporting team collaboration and event-related responsibilities.

College Dance Team – KDC CEC
Managed and coordinated dance team activities, managing rehearsals, team collaboration, and college event performances.

EDUCATION

- **B-Tech(ECE)** – College of Engineering Chengannur, Alappuzha (2022-2026)
- **Higher Secondary(Plus Two)** – NSS HSS Kaviyoor, Pathanamthitta (2021)
- **Secondary(10th)** – Amrita Vidyalayam, Thiruvalla, Pathanamthitta(2019)

LANGUAGES

- English
- Malayalam
- Tamil
- Hindi

DECLARATION

I hereby declare that the above-written particulars are true to the best of my knowledge and belief.

Place: Kerala, India
